

Condensing Gas Storage Water Heater

High efficiency burner, 316L SS
ASME* heat exchanger, BTU input
from 200,000 to 400,000 MBH

Up to 8:1 turndown

Numerous venting options

Natural gas or propane

BMS integration via open
communication protocol

Minimal space required

Feature rich interface using touch
panel controller

Scale reducing design

Low NOx emissions

- Fuel type: natural gas or propane
- Low pressure drop
- Innovative floor to tank mount configuration provides exceptional access to all components
- Increased serviceability

Applications

Office buildings, schools, hospitals,
industrial facilities, hotels, and much more.

Some sizes are available in non-ASME

NOTE: Manufactured in an ISO 9001:2015 facility.
BABA & BAA compliance is available upon request.

Meets the requirements of the ASME
Boiler and Pressure Vessel Code

NXT
PRIME SERIES

Thermal efficiency rating of 96%

The Hubbell Prime NXT is a heavy-duty, fully condensing commercial gas water heater integrated with a storage tank, factory packaged and assembled ready for installation. The Hubbell design achieves a thermal efficiency rating of 96% and is available with inputs ranging from 200 – 400 MBH. The NXT combines the best of both worlds by combining a high efficiency, high recovery gas water heater with a properly sized long lasting cement lined storage tank, reducing energy consumption, short-cycling, and stand-by heat loss.

Over 100 years of water heating expertise

Hubbell water heaters are the right choice for your commercial and industrial applications. We have water heating solutions for most energy sources with storage capacities from 1–10,000 gallons — all designed, engineered, and manufactured for reliability and longevity coupled with unparalleled support and service.
